- **Tools:** MySQL, MongoDB, Excel, PowerPoint
- **Platforms:** Jupyter Notebook, Visual Studio Code, MongoDB Compass
- **Soft Skills:** Strong Stakeholder Management, People Management, Excellent Communication

PROJECTS

Department of Computer Science Information System

- ⦿ The Department of Computer Science Information System focuses on the Study of computing technologies and their application in various fields.
- ⦿ It offers courses and research opportunities in areas such as data management, network security, software engineering, and artificial intelligence.
- ⦿ Students gain practical skills to solve complex problems in the digital age.

Institute of Computer Science and Information Systems

- ⦿ The Institute of Computer Science and Information System offers a comprehensive range of courses and research opportunities in computing technology.
- ⦿ From data management to artificial intelligence, students develop practical skill to address complex challenges in today's digital landscape.

Internal Assessment Tracking System

- ⦿ The Internal Assessment Tracking System (IATS) is a Web based platform
- ⦿ It is designed to stream line and automate the process of tracking internal assessment within an organization.
- ⦿ With features for data entry, progress monitoring, and reporting, IATS enhances efficiency and accuracy, ultimately improving overall assessment management.

Identify Gender Bias in content

- ⦿ The Identify Gender Bias in Content is a Web System in which the user can identify and categorise the content which is in form of text.
- ⦿ The Category is in different level to identify the biasness in real world
- ⦿ Aim is to make the cyber world safe by categorize the content.
